

PRESS RELEASE

SEA appoints Paul Phillips to Group Board

Advanced surveillance systems specialists, SEA (Group) Ltd, has appointed Paul Phillips a Group Director. Announcing the appointment, Chairman Roger Pinnington said: "On behalf of all the Directors, I am delighted to welcome Paul as a member of the Group Board. His appointment acknowledges the significant contribution made to SEA by Paul, whose performance and management skills have progressively played an ever-increasing key part in the growth of SEA.

Paul joined SEA shortly after the Company's foundation in 1989, and has been a director of the Company's principal subsidiary, Systems Engineering & Assessment Ltd, for 14 years. In April 2007, he was promoted Managing Director of the newly formed Defence Division, which operates in the Naval, Land, Air and ISTAR sectors and delivers approximately 65% of the Company's turnover.

Paul's Group Board appointment is very appropriate as SEA continues to expand its technical capabilities and ranges of systems and products across a wider customer base."
